

# IDS on the jury for the inVISION "Top 20 Vision Tech Startups 2024"

## Winner to be announced at VISION 2024 in October

"Startups are an indicator of developments that could become interesting on the market in the future," says Sigrid Rögner, Head of Business Innovation and Ecosystem at IDS Imaging Development Systems GmbH. IDS has been working closely with start-ups since 2018 and has built up a strong ecosystem. We regularly organise and participate in hackathons, business speed dating and startup events. These activities promote valuable exchanges and long-term collaborations. One example is the sales partnership with DENKweit, which was launched in 2023 and makes it easier for companies to access highly complex technologies.

DENKweit is one of the startups that made it into the "Top 20 Vision Tech Startups 2024" in the inVISION special edition, which Sigrid Rögner helped to select. A double-page spread in the issue also offers insights into the start-up activities of IDS.

The selected start-ups and their innovations in the fields of image processing, measurement technology and AI vision will be presented at VISION 2024 in October. We are looking forward to the trade fair and to finding out who will be the inVISION Startup 2024.
