## Reasons and Description of the Product Discontinuation

IDS is constantly working on updating and improving its products. Our uEye **CP Rev.2** cameras were initially released in 2014. Successor cameras based on a modernized new hardware platform are available.

IDS therefore decided to phase out the **uEye CP Rev.2** cameras with USB3 interface due to the **Rev.2.2** camera successor models or respectively alternative camera models.

## Recommended Action for Customers

IDS suggests to switch to the below listed successor or alternative camera models of the uEye **CP Rev.2.2** series. Customers still have the opportunity to place a final order for uEye **CP Rev.2** cameras by the date listed below. For any question regarding last time orders or successor models, please contact our sales team.

## Important Notes

- The affected discontinued cameras are no longer upgraded with firmware feature updates.
- Due to higher procurement costs, the prices of the affected cameras will increase by 10% as of January 1, 2025.

## Affected Part Numbers and Successors

In case of switching from uEye models (UI) to uEye+ models (U3) the use of IDS peak is required instead of the IDS Software Suite. We recommend evaluating the alternative new camera models.
