Reasons and Description of the Product Discontinuation

IDS is constantly working on updating and improving its products. Our **uEye SE Rev.1** cameras with USB3 interface were initially released in 2017. Successor cameras based on a modernized new hardware platform are available.

IDS therefore decided to phase out the **uEye SE Rev.1** cameras with USB3 interface due to the **Rev.1.2** camera successor models or respectively alternative camera models.

Cameras with no revision information printed on the camera label are referred to as Rev.1 cameras.

Recommended Action for Customers

IDS suggests to switch to the below listed successor or alternative camera models of the uEye **SE Rev.1.2** series. Customers still have the opportunity to place a final order for uEye **uEye SE Rev.1** cameras with USB3 interface by the date listed below. For any question regarding last time orders or successor models, please contact our sales team.

Affected Part Numbers and Successors

In case of switching from uEye models (UI) to uEye+ models (U3) the use of IDS peak is required instead of the IDS Software Suite. We recommend evaluating the alternative new camera models.
